

ACCOYA® WOODEN WINDOW AND DOOR COMPONENTS

Timber species: “Accoya wood”, (acetylated *Pinus radiata*).
Manufactured by; Accsys Technologies PLC, Brettenham House,
19 Lancaster Place, London, WC2E 7EN Tel. 02074 214300

Distributed through; International Timber, James Latham, Arnold Laver, and other quality timber merchants.

Durability: Class 1. Very durable

Moisture content: Less than 10%

Adhesives: Refer to the latest version of the Accoya Wood Information Guide

Contact with metals: Refer to the latest version of the Accoya Wood Information Guide

Coatings: Two coats of end grain sealer should be used on all exposed end grain. Any high quality coating system designed for use on timber can be used on Accoya. A minimum of basecoat(s) and one topcoat (but ideally the complete system) should be applied before exposure to moisture. For more details refer to the Accoya Wood Information Guide and our system suppliers list.

Workmanship: Generally as BS 1186-2:1988 “Timber for and workmanship in joinery, specification for workmanship”.
Joinery manufacturer to be certified under the Accsys Technologies Joinery Certification Scheme.

For further guidance refer to the Accoya wood information guide, available [here](#) or contact Accsys PLC via www.accoya.com
