Accoya® Roto & Deventer

The optimum in timber window and door performance

Roto hardware and Deventer weatherseals are pleased to announce the perfect partnership for a market leading quality window, door and sliding system.

WARRANTY

Roto hardware, glazing packers and Deventer weatherseals have been tested and approved for use on Accoya wood. Backed by a full 10 year warranty, guarantees you years of consistent and trouble free performance.

With a 50 year above ground and 25 year in-ground or freshwater Accoya wood warranty, Accoya outperforms unsustainable and carbon polluting alternatives.

Due to Accoya's outstanding performance benefits including naturally insulating properties, Accoya is ideal for applications such as windows and doors. You can lock in the warmth and cut down the price of your energy bills whilst saving time, money and hassle on frequent maintenance.

Designed, tested and certified to meet the most exacting technical standards in the industry.

Providing the best quality

Roto hardware and Deventer weatherseals systems are recognized worldwide as best in class for performance and durability, providing the very best quality in terms of:

- **operating characteristics and optimal closing compression**
- **security exceeding market standards**
- **accessibility and increased user comfort**
- **supreme corrosion protection**
- **excellent impermeability & protection from the wind & rain**

Roto hardware

Corrosion resistant and optimal performance

Roto hardware is coated as standard with the best-in-class NanoSil Level 6 surface protection. The microcrystalline structure is designed to provide protection to parts such as rivets and hinge components as well as flat surfaces.

WORLDWIDE ACCREDITATIONS

This market leading coating copes with extreme fluctuations in temperature and humidity easily exceeding all current UK corrosion resistance criteria.

Perfectly sealed

Enhancing the performance of your Accoya® timber windows or doors.

The superior Deventer weatherseals provide excellent weather performance and can offer additional advantages for bespoke requirements:

- **eliminate air leaks**
- **reduce noise**
- **improve overall energy performance**

Deventer weatherseals use a closed cell foam core and the materials have a high level of elasticity, providing:

- **low closing force**
- **strong 'shape memory'**
- **consistent performance over a long life**
