

Accoya® Decking

Timber species: “Accoya wood”, (acetylated *Pinus radiata*).

Accoya wood is manufactured by Accsys Technologies PLC, 4th Floor, 3 Moorgate Place, London EC2R 6EA

Accoya cladding is manufactured and distributed through; James Latham, Timbmet and other quality timber merchants.

Durability: Class 1. Very durable

Moisture content: Less than 10%

Appearance class: “Grade A1” as defined Accsys Technologies PLC, Accoya Radiata Pine Lumber Grading Specifications, Version 9.1

Fixings: Stainless steel, A2 or A4 grade (A4 required in coastal areas).

Decking profile: To be defined by architect.

Coating: No coating or further treatment is required (unless there is a desire to add colour to the Accoya decking, in which case is non film forming stain such as a penetrating oil should be used). To remove surface moulds/algae that may accumulate on the deck surface in damp conditions brush with water. Alkaline cleaning products should not be used though mildly acidic ones are acceptable and pressure washing should be avoided if possible or used at low pressure to avoid lifting of the grain.

For further guidance refer to the Accoya wood information guide on www.accoya.com or contact Accsys PLC via
